**Subject to Mumbai jurisdiction**

**Price** The prices quoted here are exclusive of GST and GST will be charged extra as applicable. All Prices quoted are applicable at the time of printing and are subject to alteration without any notice. Invoice will be made on the basis of the prices ruling on the date of dispatch of goods.

**Payment** Goods will be dispatched against RTGS or NEFT.

**Damage or Loss** The claim for breakage, leakage, damage and loss in transit will be entertained for all Lab pack supplies subject to fulfilling all the requirements of Insurance Company (See Insurance Clause).

**Insurance** All our Lab pack supplies made to direct customers are insured under open transit policy. The claim can only be paid subject to fulfilling all the regulations of Insurance company and receipt of claim. Please call for guidelines of Insurance Company from S D Fine-Chem Limited, Administrative/Correspondence Office : 1502, Marathon Icon, Marathon Nextgen, Off Ganpatrao Kadam Marg, Veer Santaji Marg, Lower Parel, Mumbai - 400013 \*  
Registered Head Office : 315 T.V. Ind. Estate, Worli, Mumbai-400030 India Phone : 022-24814444 Fax: 91-22 2493 7232

**Declaration** Declaration under Legal Metrology Act,2009 & Legal Metrology (Packaged Commodities) Rules, 2011, the items mentioned in the price list are only for institutional/ direct consumers & not for retail sale for personal use.

**Delivery** All supplies are made from our Factories at Boisar/Poicha. While every effort is made to adhere to delivery dates, no responsibility shall be accepted for non-delivery or delayed delivery. Items offered ex-stock are subject to the goods being unsold on the date of receipt of the order.

In certain states, where we have sales depot, supply will be made from there as far as possible. But we reserve our right to supply from Boisar/Poicha and G.S.T. will be charged extra. If the value of goods dispatched exceeds Rs. 20,000/-, net free delivery will be made. Goods will be dispatched by road transport as far as possible. Wherever road transport facility is not available goods will be dispatched by goods train to the nearest railway station. If the goods are supplied by passenger train, post parcel, angadia, courier at the customer's request, etc., 50% of the freight will have to be borne by the customer. Where value of goods dispatched is less than Rs. 20,000/- net packing, forwarding and freight will be charged extra. Where it is not possible to know the exact freight in advance, the goods will be sent on "freight to pay" basis. Order less than Rs. 3,000/- net, will not be supplied.

**Note :** Chemicals listed in this price list are for laboratory use only unless otherwise specified. We are not responsible if they are used for other Applications or for an accident or loss due to mishandling/non-compliance of good laboratory practices (GLP) while using these chemicals.

PLEASE FORWARD ALL ORDERS IN DUPLICATE

**Symbol interpretation**

**\*\* Not covered under rate contract. Controlled substance. For purchase call for our circular. I For information P: Items are supplied in all packings from POICHA factory only. T = Items are supplied from Tarapur Factory # This packing will be available till stock last. ▲ No GST, ● MOQ Required**

**PRODUCT QUALITY DEFINITION**

We are pleased to introduce our Price list for the year 2023-24 which is aimed at helping you to choose the right chemicals. This year we have bifurcated the price list into 3 parts. 1st reflects our main wide range of chemicals, 2nd incorporates AAS, ICP standards, NIST Traceable solutions, deuterated solvents and the 3rd list consist of our Instrument division products.

**Laboratory Rasayan Grade (LR & Extrapure)**

These consist of wide range of organic and inorganic reagents in preparative chemistry and other diverse fields. Its range covers all the chemicals required on day-to-day basis for all types of chemical laboratories. We offer Guaranteed quality at affordable prices.

**Analytical Rasayan Grade (AR)**

These chemicals are useful in sophisticated analytical instruments and research work, where high purity is essential. Our stringent quality controls guarantees, minimum assay and maximum limit of trace impurities.

**Universal Reagent (UR) NEW**

We have introduced "Universal Reagent" as a new grade. Quality is similar to our AR Grade specifications. These chemicals are useful in sophisticated analytical instruments and research work, where high purity is essential. Our stringent quality controls guarantees, minimum assay and maximum limit of trace impurities.

**HPLC / Gradient / LC-MS / ULC-MS Grade Solvents**

An extensive range of highly characteristic HPLC solvents are produced and tested as per the latest techniques to assure interference-free HPLC separation and detection. Key parameters such as UV absorbance, transmittance, non-volatile matter, moisture content, fluorescence impurities and assay are very carefully controlled. Packing is done in laminar flow by purging nitrogen and using very fine filter. An inert teflon plug is used to seal each bottle thus ensuring absolutely particle free solvent. In our pursuit for excellence, we are providing actual UV absorption graph of the batch, on the label of each bottle as guarantee. A range of LC-MS / ULC-MS solvents suitable for HPLC and Ultra High Performance LC system coupled with Mass Spectrometer detector. This range of solvents & buffer is characterized by high purity, very low UV abs., well controlled base line drift, min. LC gradient elution peak height, min. metallic impurities and very low NVM levels. Thus this range is a boon for R & D, ADL and even routine LC-MS analysis

**GC-HS solvents**

For "Gas Chromatography - Head Space" analysis, a whole range of GC-HS solvents are available which are specially developed for OVI/ Residual solvents analysis as per Pharmacopoeia or ICH guidelines. These solvents are suitable for GC-HS Applications using a Head Space GC with auto injector and are characterized by very high purity, very low NVM, extremely controlled residual solvents meeting USP/ ICH requirements and also high UV transmittance.

**Dry Solvents**

These solvents find their use in Moisture Sensitive Reactions.

### Spectroscopy Grade

These are solvents of high optical purity for UV/Visible/IR/ Fluorescence/NMR and Mass spectroscopy. The certificate of guarantee includes assay, minimum % of transmission at certain defined wavelengths in UV range, moisture content, nonvolatile matter. Packing techniques are same as HPLC solvents.

### High Purity 99.9% Ethanol Omnis Grade

We have introduced "Ethanol absolute 99.9% OMNIS"-A very high purity solvent & a versatile reagent which conforms to LR, AR, Dry AR, ACS, ISO, MOS, BP, USP, Ph. Eur specifications. It finds Application as Analytical reagent, in Pharmaceutical preparations, Biochemical Applications, Organic intermediates, Solvent & Molecular Biology preparations & DNA synthesis.

### OMNIS Grade (MN) NEW

This is new grade of high purity reagents "OMNIS". This grade is suitable for manufacturing of excipients and pharmaceutical Applications. For high end and where trace level analysis is required we recommend omnis grade. Limits of impurities is low in this grade. Specification includes range of impurity profile along with microbial limit test and ovt test.

### Pesticide Residue Analysis Solvents

These solvents are developed especially for the Applications in residual pesticides analysis and analysis of other lowvolatile, environmentally relevant substances by using GC/ECD or GC/PND or GC/MSD instrumentation. These solvents are also suitable for analysis of polychlorinated biphenyls (PCBs) class of substances.

### Research and Speciality Chemicals

More New Chemicals are introduced for Research and Synthesis purpose. These chemicals are packed in high quality packing material.

### Buffers/ Tablets / Capsules/ Solutions

Buffers are provided in tablet form, capsule, powder form, as well as in solution form to work in varying pH ranges in chemical and biochemical fields.

### Pharmacopoeial Grade Chemicals

These Chemicals are for the Pharmaceutical industries and conform / comply to the standards of latest Indian (IP), United States (USP-NF), European (Ph. Eur.), British Pharmacopoeia (BP).

### Life Science Products

We are introducing wide range of nucleic acid purification and Protein products for your Lab. These products are meant for research institutes, Universities, Pharma Companies who are into molecular biology research and development of cell lines. Some item are shifted in dry ice.

### Indicator powders, solutions and papers

Various types of indicators such as adsorption indicator, metal ion indicators, pH indicators, redox indicators of high purity are provided as powder as well as ready to use liquid forms for analytical purpose.

### Diagnostic Reagents

These chemicals are produced for the use of various hospitals, clinical and pathological laboratories for diagnostic purpose. These are specifically tested for their applicability

### Microscopic Stains

These chemicals are provided as powder and ready to use solution form for Microbiology, Haematology, Histology, Cytology. The quality is ensured by stringent quality control checks.

### Biochemicals

These are high purity chemicals specially manufactured and tested for biochemical research. As required, heavy metal content is carefully monitored and reduced to minimum possible levels. Our biochemists also carry out various tests to ensure suitability for desired Applications. Our range includes alkaloids, amino their derivatives, buffers, carbohydrates and their derivatives, enzymes, enzyme substrates, nucleotides & derivatives, etc.

### FCC

FCC grade material (FSSAI approved) - Our manufacturing facility is FSSAI approved. We have license for wide range for FCC grade material. These will cater to your food grade requirements.

### Kjeldahl Tablets

A wide range of kjeldahl tablets are now available. More than 20 different variety of tablets for analysis needs. These covers different requirements for kjeldahl method used.

### ACS-ISO Grade

Very high purity solvents meant for Analytical & as per applied areas & according to American Chemical Society Standards and International Standard Reagents for chemical analysis.

### Molecular Biology & Electrophoresis Grade

Wide range of Molecular Biology & Electrophoresis reagents - which are free from DNA, RNA & Protease and find Application in the purification, isolation & of nucleic acids & related compounds.

### Electronic Grade (EL)

These chemicals are specially meant for electronic industry looking for high levels of purity and trace impurities. Medium level of metallic impurities below 10 ppm level.

### Trace Analysis Reagent - "TAR"

"TAR" class of products are characterised by their extremely low levels of metallic/elemental impurities, thus supplementing EL grade. "TAR" stands for Trace Analysis Reagent. These products are mainly acids, or sometimes bases. These are specially crafted for use in AAS & ICP analysis, electronics and semi conductor industries, for PCBs, components cleaning. In "TAR" range of products, emphasis is on controlling metallic/elemental impurities to extremely low levels in sub-ppm range. Typically profile of each "TAR" class product contains 30-40 metallic/ elemental impurities in ppb range. Besides, this, these products are also controlled for smallest particulate contamination.

### NIST traceable volumetric solution & pH Buffers

New range of NIST Traceable solution in form of volumetric solution and pH Buffer Solution are available. Volumetric solution will be useful for Acidimetric, Alkalimetric, Argentometric, Iodometric, Oxidimetric analysis requirements. Traceability details are mentioned on COAs. pH Buffer solution covers range of pH from 1 to 12. These are NIST Traceable with stringent specification.

### Culture Media Ingredients.

These chemicals are used for preparing culture media for cultivation of micro organisms like bacteria, fungi, etc. These are specifically tested for their ability to support luxuriant growth of microorganisms.

### Auxillaries

Auxillaries such as disinfectants, sterilizing solutions, tablets for water hardness determination. Laboratory cleaning agents are also included in our product list.

### Accessories & Testing Kits

Semi-quantitative test papers, test strips and water analysis kits We are also introducing a wide range of semi-quantitative test papers & test strips for quick elemental, anionic and water hardness determination, besides, offering a similar range for qualitative determination as well as for pH determination.

### Filter Papers

A wide range of filter papers of international standard, in circle/sheets are available for general purpose & for qualitative, quantitative and chromatographic Applications. Also offered cellulose/glass microfibre thimbles for extraction, optical lens cleaning tissues & phase separation papers.

### ABBREVIATION
