PRICE LIST 2023-25

biohall[®]
Germany

Welcome to

biohall®

With immense pleasure we welcome you to our 2023-25 edition of BIOHALL catalogue cum price list..

It takes great pleasure to share that we have extended our reach to 50 countries, and even more pleasure in sharing the fact that our range has been really liked for its best and consistent quality along with economical pricing .This year we have started a new facility specializing in OEM order handling which gives us an edge over others in quick and swift processing of orders at the same time delivering consistent quality. Addition of more warehouse space for both finished goods and semi finished goods has helped to minimize the delivery time.

Our facility which is already producing labware according to ASTM, DIN, EN ISO has been more equipped with latest technology machinery to keep producing the best in class Glassware , new machines have been added to upscale the production and cater to the ever increasing demand in the global market.

Our post purchase service and grievance handling process has been well appreciated and immensely applauded over past years. Delivery highest quality labware is one dimension of our business but at the same time any issue if at all which arises has been keenly sorted out and we aggressively work in the direction to maintain highest standards of service for pre and post purchase.

At Biohall we have strived hard to identify the gaps in the market space and the requirements of research fraternity. Biotechnologists at the heart of operations have ensured the requirements being fulfilled with right product with right quality and most importantly at the right cost. With the same Zeal we wish to continue the same forever.

We are an ISO certified company our high quality products and in-house stringent testing methods have helped us earn a huge clientele all over the world. Our dedicated research & development department strive to work hard to maintain our brand and continuously upgrade ourselves to provide best in industry solutions to clients.

Any products which falls outside the range of catalog can be inquired for separately and we will do our best in providing the same, we can also be contacted for customized glassware.

Our Manufacturing Facility

Biohall manufacturing facility employs state of art manufacturing machines to create glass with world class quality. Biohall employs more than 55 glass blowers to make a wide product range as required by our vast customer base globally.

Our capacity enables us to produce and ship over 15 containers per month. Our complete range of products which encompasses from interchangeable range to Volumetric ware and filtration glassware to general glassware range are produced Inhouse using Automatic and semi-automatic machines.

Annealing Process is an integral part of the manufacturing process and carefully each and every product produced undergo annealing process to create stress free and strong glassware.

Calibration Facility

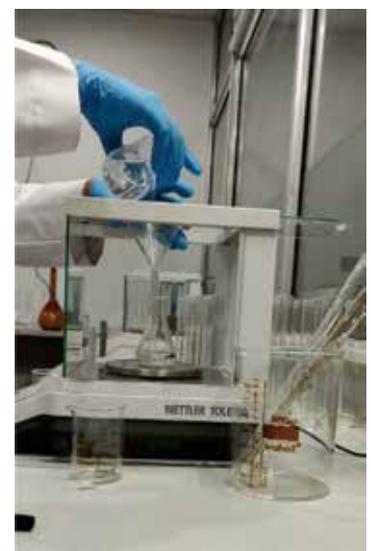

We are committed to produce highly accurate Labware with an in-house ISO 17025:2017 accredited laboratory, well equipped with the latest equipments for calibration under well controlled environment.

Biohall Calibration Laboratory has undertaken accreditation for its system for calibration and Testing as per ISO 17025:2017, which means the calibration provided to customers for volumetric ware is acceptable in calibration laboratories worldwide.

Results of calibration are guaranteed for precision as per DIN, ISO AND USP standards, The German calibration machines ensures the highest level precision.

During the calibration process on the Automated german machines:

- The blanks are filled precisely with defined amount of triple distilled water under fixed temperature.
- Lowest meniscus point is determined by laser controlled sensors and a fine diamond wheel automatically marks the calibration.

- Cylinders, burettes and pipettes are marked for minimum two point calibration lines.
- The wet surface area factor is always taken into account throughout the process..

Biohall Automatic Volumetric Calibration Machine

All calibration laboratories at BIOHALL are strictly controlled and done under highly controlled environment maintain right temperature ,pressure and humidity. This temperature is very important for the accuracy so if the environmental temperature is different , calibration machines have to be adjusted accordingly.

All volumetric glassware is calibrated either as “To contain” “TC, In” or “To deliver” “TD, Ex”.

Types of Certificates

Conformity Mark DE-M

Volumetric instruments that comply with the requirements of applicable standards (e.g. the German weights and measures regulation) are labelled accordingly with “DE-M”. The “DE-M 19” mark is made up of the elements DE (which stands for “Deutschland”), M (which stands for “Metrologie” (metrology)), and the year number 19(2019), the year in which the measuring instrument was labelled).

Batch Certificate

Volumetric flasks, measuring and mixing cylinders with a batch number and accuracy class A are supplied with a batch certificate. This certificate documents the mean value obtained from measuring the batch in question, the standard deviation and the day of issue. The batch certificates can also be retrieved online. The batch number consists of four digits, e.g.: The first two numbers specify the production year, and the following two numbers specify the batch.

Individual Certificate

Volumetric flasks which are numbered individually, are supplied with an individual certificate. The individual number is permanently laser-etched onto the base of the volumetric flask and is entered on the corresponding certificate. The volume measured for the corresponding volumetric flask, the measurement uncertainty and the day of issue are documented on this certificate. The individual number is a consecutive number and comprises three letters and a four digit number.

USP Individual Certificate

The volumetric flasks are labelled with an individual number. This is permanently etched onto the base of the volumetric flask and is entered on the corresponding certificate. The accuracy limits for USP compliant volumetric flasks are stricter than flasks conforming to ISO 1042 and therefore satisfy the requirements of the United States Pharmacopoeia (USP). The volume measured for the corresponding volumetric flask, the measurement uncertainty and the day of issue are documented on this certificate.

Compliance Certificate

Certificate of Compliance is issued with Beakers, Conical and Reagent bottles to certify their compliance with the respective standrds. This certificate is provided with each and every piece.

biohall® Fabrik für Laborglas

CALIBRATION CERTIFICATE (Class "A")

[ISO 17025:2005 CERTIFIED LABORATORY]

Item Tested: Volumetric flask 100 ml
Lot No.: 04.19
Test Method: Gravimetric Method
Item Tested on: 10/04/2019
Nominal Volume: 100 ml
Tolerance: ± 0.10 ml
Standard Deviation: 0.001 ml
The Product was found to contain the following volume at 20 degree Celsius
Certified Volume: 100.005 ml
Delivery Time: NA
Standard weight: 100 g
Balance: (METTLER) Sr. no. 2738421143
Thermometer: DM201D : -40 to 900°C/0.1°C
 All the above devices have valid calibration traceable to German weights and standards, traceable to International Standards.
 The product has been found to compliant to **ISO 1042:1998 CLASS A**. The above calibration result is valid at the time of calibration under lab conditions and calibrated at 20°C at RH 48%.

Calibrated by:

Ms. Sori Maheshwarl
 Date of issue: 14/04/2019

CALIBRATION CERTIFICATE

biohall® Fabrik für Laborglas

Conformity Certificate

Description: Biohall GL 45 Laboratory Glass bottle with screw cap and pouring ring (PP).

Production & Inspection: The Articles listed under catalog Number are hereby confirmed to BIOHALL Quality system according to DIN ISO 9001 duly certified by UK Certification & Inspection Ltd.

Address: 73-75 Shelton Street Covent Garden London, United Kingdom
 Certificate Registration No. IEC 3042.

The properties of Biohall glassware corresponds to Applicable Technical Regulation/Standards/Procedure:
 ISO 4796-1:2016
 Packing type: Die cut Boxes

Chemical Durability:
 Biohall Glassware is highly resistance to water, neutral and acid solutions, concentrated on acid and their mixtures as well as to chloride, bromine, iodine and organic matters.
 Even during extended period of reaction and temperatures above 50° C., its chemical resistance exceeds of most metals and other materials.
 It can repeated dry and wet sterilization without surface deterioration and subsequent contamination.

Note:

- Only hydrofluoric acid, very hot phosphoric acid and alkaline solutions increasingly attack the glass surface with rising concentration and temperature.
- Do not Autoclave Reagent Bottle with tight cap, plug sterile cotton during autoclaving.

CATALOG NO: BLS.1105.04
RETRACE CODE: 8C04C 430
CAPACITY: 250 ML
Signature Quality Manager:

Chemical Composition:
 81% in weight: SiO2
 13.0% in weight: B2O3
 6% in weight: Na2O

Thermal Properties:
 Coefficient of Linear Expansion: 12.5 x 10⁻⁷°C
 Strain point: 515°C
 Annealing Point: 565°C
 Softening Point: 605°C
 Specific Heat: 0.2
Thermal Conductivity
 (Cal/cm 3°C/Sec): 0.0027

Material:
 3.3 borosilicate glass is a low alkali borosilicate composition. It is virtually free of magnesia lime-SiO2 group and contains only traces of heavy metals.

Quality Policy

Delivering Quality is the foundation of Biohall and no stone is left unturned when it comes to implementing best quality control parameters. We conduct periodical internal audits to keep check over all the quality systems implemented as per our ISO 9001:2015 standards and ensure our commitment to quality is well experienced by our customers.

All our systems and processes are audited through a three stage audit system involving internal and external audit agencies. Our business philosophy for Total Quality Management is KAIZEN.

We emphasize on Critical to Quality policy and implement six sigma through DMAIC Approach.

We believe in delivering quality in the product and also the service which include pre and post purchase query and complain/grievance handling.

Our Quality Assurance Process

Raw Material

Right raw material as per our prefixed quality standards are procured from our partners. Biohall makes all its Products from tubing of ASTM E-438 TYPE I, CLASS A BORO 3.3 GLASS.

Production

The automated and semi automated machines are used to produce the products as per the technical drawings made according to international standards.

Dimensional Confirmation Checks

Dimensional checks are performed by the QC departments for their adherence to the defined standards.

Glass Optical Checks for Stress & Scatches

Each piece produced is checked for the stresses which might cause the cracking of the glasses and also for scratches which might happen while handling at each step for producing glass quality.

Glass Thickness and Strength

Every single piece produced is essentially checked for the wall thickness to determine the strength and ensure adherence to standards set as per DIN/ASTM/ISO.

Joint Testing

The Joints are tested for their fitness as per their taper of cones and sockets to ensure highest level fitness and ensure no leaks. Vacuum tests are performed subsequent to the fitness checks to ensure absolutely no leaks.

Post Printing Checks

The Glassware is checked for the print quality at two stages first before putting in the furnace and after taking out of furnace, this ensure no product with defective print reaches the market.

Pre & Post Purchase Service

We ensure that ease of doing business with biohall should be first motivation for each client and hence ensure top class service when it comes to smooth communication, query handling and grievance redressal approach.

Delivery Policy

We believe in clear commitments for delivery and maintain heavy stocks for all the products to fulfill our orders well on time with shortest lead times. Our warehousing capacity which is increasing with each year has capacity to hold both finished goods and semifinished goods (for OEM) to ensure shortest lead time for both Biohall brand and OEM customers. In rare cases where the fulfillment is not possible with the in-house stocks we commit clear timelines for delivery and religiously adhere to the same.

Packaging

We use packing material of high grade so as to ensure minimum breakage of material while transportation at the same time ensuring presentation of the product is world class. We use german packing standards and collaborate with leading packaging company for specialized solutions for the same.

Printing

The next step of the glassware production is silk screening on the bodies of the calibrated products. The stretchable screen stencils are used in printing process carried out at Biohall. These stencils are easily stretched to match the calibration marks so that volume precision is maintained for all volume levels.

BIOHALL uses 3 different colors of ink (blue / amber / white) that are specially manufactured to be used on laboratory glassware.

As a standard BIOHALL product line is printed with Amber ink whereas Blue and White prints are also available upon request. Regardless of the color, highly contrasted and fine printing allows precise reading, especially for scaled products such as measuring cylinders, pipettes and burettes.

Highest Quality lead free Inks are used for the printing process and ensure the inks are chemical resistant and more importantly acid resistant.

ADVANTAGES OF GERMAN AMBER INK used at BIOHALL:

- Better absorption
- Biohall Amber print is Resistant to any acid known to human kind
- Biohall Amber stain graduation penetrates into the glass surface via ion exchange process and is, therefore, more resistant than the blue or white, the color is practically indestructible. It is best suited for daily usage as it does not wear off by heavy and extreme usage.
- Amber ink is absorbed and furnaceed twice at a temperature range of 560 degree C which makes the stain penetrate and absorb the glass surface better hence highly resistant to acid /alkaline attack.
- It has the rich contrasts an excellent readability. The graduation of the glass is done by screen printing. For volumetric range stretch-stencils are used, which ensure an especially precise compliance with the calibration points.

According to the DIN standards, the following information has to be printed on the bodies of all volumetric glassware:

- Brand
- Nominal capacity
- Class degree
- Calibration temperature
- Standards
- Possible error limits
- Batch numbers

Furnace and Heating

All the products coming out of the printing room are put into specially designed and temperature controlled tunnel furnaces so that heating and annealing processes can be accomplished successfully.

The temperature control of the furnace ensures a long lasting printing quality. In order to get the highest levels of precision, carefully controlled gradual heating and cooling processes are essential.

OEM Policy

We are open to produce the material for our associates in their own established brand names at a very economical price and at the same time meeting all the quality standard mentioned. We are already producing highest quality material for some leading brands around the world.

For enquiries of OEM product regarding prices and MOQ please contact us at sales@biohall-labware.com

German Calibration Regulation

- Biohall strictly follows Conformity testing of volumetric measuring devices pursuant to the German Calibration Regulation (Eichordnung)
- According to the specifications of the German Calibration Regulation (Eichordnung), manufacturers can certify the conformity of volumetric measuring devices to the requirements of the German Calibration Regulation since 12.08.1988. The specifications of the German Calibration Regulation, Annex 12 and DIN 12600, in which the conformity testing procedure is described, form the basis in this respect.
- The conformity certificate is required for volumetric measuring devices used in the area regulated by law. Conformity certificates can only be issued for Class A and AS volumetric measuring devices.

BIOHALL Product Standards (Standards for volumetric measuring devices)

1. DIN (Deutsches Institut für Normung), the German Institute for Standardization
 DIN standards are German standards compiled by working committees within DIN to maintain the general standard of technology.
 Volumetric measuring devices such as measuring flasks, measuring pipettes, measuring cylinders, volumetric pipettes, burettes, capillary pipettes and volumetric measuring devices with pistons are governed by standards pursuant to DIN.
 Adherence to the DIN standard is a component part of the calibration certificate issued pursuant to the German Calibration Regulation (Eichordnung).
2. ISO (International Organization for Standardization)
 ISO standards are international standards compiled by the International Organization for Standardization. These international standards are adopted as German standards.
3. ASTM (American Society for Testing and Materials), ASTM standards are international standards compiled for the USA.
 Biohall uses imported borosilicate 3.3 glass with a minimum content in silica of 80% and a low expansion coefficient ($3.3 \cdot 10^{-6} \text{ K}^{-1}$) included in the 3.3 borosilicate group, as defined in ISO 3585 standard. This particular combination of properties makes this type of glass the most used in labware.

Physical and Chemical Properties

Linear expansion coefficient (@ 20/300 °C)	3.3•10 ⁻⁶ K ⁻¹
Strain point	520 °C
Annealing point	560 ± 10 °C
Softening point	820 ± 10 °C
Density	2.23 ± 0.02 g/cm ³
Hydrolytic resistance (according to ISO 719, water at 98 °C)	Class 1
Hydrolytic resistance (according to ISO 720, water at 121 °C)	Class 1
Resistance to acids (according to ISO 1776, DIN 12116)	Class 1
Resistance to alkalis (according to ISO 695)	Class 2

Typical Composition

80,4% in weight SiO₂
 13,0% in weight B₂O₃
 4,2% in weight Na₂O
 2,4% in weight Al₂O₃

PROPERTIES OF OUR BOROSILICATE GLASSWARE

Hydrolytic resistance

1. The resistance is determined with two methods, at 98 °C and at 121 °C: 1. Acc. to DIN ISO 719 BIOHALL® corresponds to hydrolytic resistance class 1 (of five classes). The amount of Na₂O/g glass grain leached out after one hour in water at 98 °C is measured. The quantity of Na₂O leached out is less than 3 µg/g of glass grain.
2. It also corresponds to hydrolytic resistance class 1 acc. to DIN ISO 720 (of three classes). The quantity of Na₂O leached out after one hour in water at 121 °C is less than 62 µg/g of glass grain. Due to its good hydrolytic resistance BIOHALL® meets the requirements of the USP, JP and EP for a neutral glass according to glass type 1. Therefore it can be used in an almost unrestricted way in pharmaceutical applications and in contact with foodstuffs.

Acid Resistance

Acid resistance can be determined by two methods:

1. In accordance with DIN ISO 12116 - BIOHALL® corresponds to class 1 (of four classes). The acid removal is measured at fire finished glass surfaces, as a time dependent weight loss under the exposure of 18 % hydrochloric acid. After a boiling period of three hours this removal is only 0,3 mg/dm².
2. In accordance with DIN ISO 1776 the attacked layer thickness of the glass is examined in dependency of the type of acid and its concentration. The maximum attack occurs at acid ranges of 4-7 n. At higher concentrations, the reaction rate decreases significantly, so that the layer thicknesses which are attacked are only in the range of a few thousand µm after years. Thus, the mechanisms of acid attack are not relevant for the wall thicknesses of laboratory glasses used in practice.

Alkali Resistance

In accordance with DIN ISO 695 BIOHALL® corresponds to alkali resistance .The surface erosion after three hours boiling in a mixture of equal volume fractions of sodium hydroxide solution (concentration 1 mol/l) and sodium carbonate solution (concentration 0,5 mol/l) is only 134 mg/100 cm². The surface removal through alkali

is directly proportional to time. A visible attack on the glass surface takes place only at temperatures above 60°C, at lower temperatures the reaction rates are so low that hardly any reduction of the wall thickness takes place over a period of years. Long-term tests have shown that the use of NaOH with a concentration of 1 mol/l at an operating temperature of 50°C produces a glass surface removal of 1 mm after 25 years in a continuous flow.

Autoclaving of BIOHALL Laboratory Glass

According to DIN 58900, part 1 and DIN 58946, part 1/2, 1987, hot air sterilization is the “killing resp. irreversible disabling of all augmentable microorganisms” under the influence of “saturated steam of at least 120°C and 2 bar”. As minimum residence time (time to kill + excess time) is considered for 20 minutes at 121°C. A raised vapor temperature of 121°C is only possible with a raised pressure of 2 bars. Vessels must only be hot air sterilized with open closures, to avoid additional pressure build-up resulting in breakage.

Temperature Resistance When Heated And Thermal Shock Resistance

The maximum permissible operating temperature for BIOHALL® is 590°C. Above a temperature of 626°C BIOHALL® begins to soften and at 860°C it changes to the liquid state. As it has a very low coefficient of linear expansion ($\alpha = 3.3 \times 10^{-6} \text{K}^{-1}$), a feature of BIOHALL® is its high thermal shock resistance (up to $\Delta T = 100 \text{ K}$). For a temperature change of 1 K, the glass changes by only 3.3×10^{-6} relative length units, resulting in low levels of mechanical strain where a thermal gradient exists. The thermal shock resistance is depending on the wall thickness and geometry of the products.

Temperature resistance at low temperatures

BIOHALL® can be cooled down to the maximum possible negative temperature and is therefore suitable for use with liquid nitrogen (approx. -196°C). During such freezing you have to observe the expansion of the content. In general BIOHALL® products are recommended for use down to -70°C. Besides the geometry of the products you also have to pay attention to the property of the used components. During cooling and thawing ensure that the temperature difference does not exceed 100 K. In practice, stepwise cooling and heating are recommended.

Care & Maintenance of Laboratory Glassware

To obtain the maximum performance from your laboratory glassware correct handling is essential. The following information is a guide on the safe handling of Biohall glassware and tips on how you can optimize its performance and life span.

General Precautions

We recommend that all glassware is washed before it is first used.

Before using any piece of glassware, always take time to examine it carefully and ensure that it is in good condition. Do not use any glassware that is scratched, chipped, cracked or etched. Defects like these can seriously weaken the mechanical strength of the glass and cause it to break in use.

Dispose of broken or defective glassware safely. Use a purpose-designed disposal bin that is puncture resistant and clearly labelled. Biohall® glassware (or any other borosilicate glass) should under no circumstances be disposed of in a domestic glass recycling stream (e.g. bottle banks), as its high melting point makes it incompatible with other glass (soda-lime glass) for recycling. The correct method of disposal is to include it in the general waste in accordance with the relevant guidelines, provided that the glass is free from any harmful chemical contamination.

Never use excessive force to fit rubber bungs into the neck of a piece of glassware. Always ensure that you select the correct size of bung.

Many Biohall® glass products are supplied with durable, easy to use plastic screw thread tubing connectors to allow the safe fitting of any flexible tubing. When attaching tubing, ensure that the screw thread connector is removed from the glassware, the tubing is lubricated and protective gloves are worn. Never use excessive force to connect the rubber hose or tubing.

Carrying or lifting large glass flasks, beakers or bottles, etc. by the neck or rim can be very dangerous. Always provide support from the base and sides.

When stirring solutions in glass vessels, avoid using stirring rods with sharp ends which can scratch the glassware causing it to become weakened.

Heating and Cooling

The maximum recommended working temperature for Biohall® glassware is 500 °C (for short periods only). However, once the temperature exceeds 150 °C extra care must be taken to ensure that the heating and then cooling of the glassware is achieved in a slow and uniform manner.

Always heat glassware gently and gradually to avoid sudden temperature changes which may cause the glass to break due to thermal shock. Similarly, allow hot glassware to cool gradually and in a location away from cold draughts.

If you are using a hotplate, ensure that the top plate is larger than the base of the vessel to be heated. If the base of the vessel overhangs the hotplate top, hotspots can occur causing the base of the vessel to break. Also, never put cold glassware onto a pre-heated hotplate. Always warm up the glassware from ambient temperature.

If you are using a Bunsen burner, employ a soft flame and use a wire gauze with a ceramic centre to diffuse the flame. Never apply direct localised heat to a piece of glassware.

Biohall® borosilicate glass is microwave safe. However, as with any microwave vessel, ensure that it holds microwave absorbing material, before placing it in the oven. Many of our products utilise plastics screwcaps and connectors. These components are typically manufactured from polypropylene or PTFE, both of which are also microwave safe.

When autoclaving containers e.g. bottles with screwcaps, always loosen off the caps. Autoclaving glassware with a tightly screwed cap can result in pressure differences which will cause the container to break.

Vacuum and Pressure Use

Because working conditions can vary enormously, Biohall cannot guarantee the performance of any of its glassware when used under vacuum or positive pressure. The application of positive pressures inside glass apparatus is particularly hazardous and should be avoided, if at all possible. Safety precautions should always be taken to protect personnel and a number of these are listed below:

Always use an adequate safety screen and/or protective cage when using glassware under vacuum or positive pressure.

Flat bottomed vessels such as Erlenmeyer flasks and bottles should not be used under vacuum as they are likely to implode. Exceptions are vessels with specially thickened walls such as Buchner filter flasks and desiccators.

Under no circumstances should glassware that is scratched, cracked or chipped be used. Any damage to the glassware will seriously impair its mechanical strength. Never subject glassware to sudden pressure changes. Always apply and release pressure gradients and vacuums gradually.

Avoid stressing the glass by over-tightening clamps. Support glassware gently where possible.

Biohall Ground Glass Joints

To prevent joints leaking in use and to assist separation, lubricate the ground surfaces of the joint with a silicone-free laboratory grease. Apply a light coating completely around the upper part of the joint.

If ground glass joints do seize, we suggest the following remedies to separate the joint: Always wear thick protective gloves and safety spectacles. Never use force. Carefully rock the cone (inner joint) in the socket to achieve separation.

If the joint is dry, try to provide lubrication. Hold the joint upright and add penetrating oil to the top of the cone. Wait until the penetrating oil is well dispersed into the joint before trying to separate.

If the use of temperature is permissible e.g. no volatile substances are present, warm the outer socket under a running stream of hot tap water. Hold under the tap for a few minutes before trying to separate the joint.

Biohall Volumetric Glassware

Always ensure that volumetric glassware is kept scrupulously clean. Dirt, and especially grease, can distort the shape of the meniscus and can also cause droplets of liquid to adhere to the vessel walls. Both seriously impair accuracy. (Good cleanliness is indicated by uniform wetting of the glass surface with distilled water).

Never pipette by mouth. Always use a purpose designed pipette filler.

Autoclaving at 121 °C and cleaning glassware in an automatic dishwasher will not affect the accuracy of Biohall® volumetric products.

All items should be held in a vertical position when reading the meniscus. The meniscus should be at eye level to avoid parallax errors.

If using strong corrosive acids, etc. select volumetric products manufactured from chemically resistant Biohall® borosilicate glass.

Never expose volumetric glassware to direct heat e.g. hotplates and Bunsen flames, as this will affect the accuracy.

Volumetric Glassware

BIOHALL® volumetric glassware are robust, virtually inert and exceptionally resistant to high temperatures. Outstanding corrosion protection also guarantees they are particularly cost effective. Stringent specifications apply for the selection of raw materials and mixture preparation for the borosilicate glass 3.3. In addition, because Biohall® laboratory glassware is manufactured exclusively in-house, high quality is guaranteed. This applies to every manufacturing phase – from glass melting through to calibration. The result: outstanding precision during volumetric measurement.

The volumetric instruments are essentially available in the accuracy classes A, AS and B.

Accuracy class A:

- Denotes the accuracy limit in accordance with DIN and ISO and is therefore the most accurate class. A conformity mark is printed on volumetric instruments in class A to indicate they satisfy the requirements of the German weights and measures regulation and the applicable standards.

Accuracy class AS:

- Denotes pipettes and burettes in accuracy class A with a rapid discharge (S). The waiting time is significantly less than with class A.

Accuracy class B:

- Denotes an accuracy limit which is twice as large as class A.

CYLINDERS

Measuring Cylinder with Round Base, Class-A, DIN/ISO

- Complies as per DIN EN ISO 4788 With conformity batch certificate
- "Eichordnung" (as per German weights and regulation standards), "H" mark signifies German regulation as DIN 12600 Calibration (TC, In)
- With round base, Manufacture from Boro 3.3, * Non DIN

Round Bottom Flask, Single Neck with Joint

- Made from ASTM E-438 Type 1, Boro 3.3 heat resistance glass
- These Flasks comes with Ground Joint
- Manufactured as per ASTM E-1403 type 1 specifications
- Complies with DIN /ISO 4797 & USP Standard

Flask, Distillation, With Side Tube

- With side tube and reinforced bead
- In Compliance to ASTM 1405 Standard
- Uniform wall thickness distribution makes these Flasks ideal for heating
- All sizes have a durable matt-finished enameled area for marking
- Suitable for distillation process

Item Code	Capacity (ml)	Pack of	INR/Piece

Milk Pipette Gerber

- Complies with IS 1223 (Part II)
- These Pipettes are used for testing milk by the Gerber method.
- Sturdy, designed to last long, Gerber Milk Pipettes are one-mark transfer Pipettes for measuring 10.75 ml
- They can be also be used in rural Milk Collection Centres

Item Code	Capacity (ml)	Tolerance (\pm ml)	Pack of	INR/Piece

Water Stills With Silica Sheathed Heaters

- Water stills are carefully designed to produce high purity pyrogen free distilled water. The water still of borosilicate glass comprises of horizontal type boiler, condenser, constant level device, silica sheathed (Quartz) heater, along with stand and clamps.

Compact Design. All parts are replaceable.

- Features:
- Borosilicate condenser & boiler are fitted with a removable silica sheathed heater & screw threaded connectors for ease of cleaning when scaling is formed.
- Distillate temp. is around 25 to 45°C which is ensured by an efficient condenser.
- The stand is powder coated for rust free operation and lustrous appearance.
- The unit automatically switches off if water level in the boiler falls below heater.
- Cooling water from the condenser is re-circulated into the boiling chamber, hence saving energy.
- Boiler is provided with a Replaceable Side Over Flow for easy draining and cleaning of boiling chamber, which also reduces the chances of breakage.
- Fuse is provided for safety in case of voltage fluctuation or short circuit.
- Electrical Power: 220/240 V, 50/60Hz, Single Phase Supply.
- Unique Feature: This model is equipped with in Built Safety Cut Off Device which protect the glass in case of water failure & overheating.

Single Still Distillation Unit

- Conductivity 1 to 2.0 $\mu\text{s/cm}$
- pH 5.5-6.0

Item Code	Output	Cooling Water Consumption	Power Rating KW	Pack of	INR/Piece
BLS.SSD.01	1.5 ltr/hr	40 ltr/hr	1.5 Kw	1	34000

Automatic Water Distillation Equipment (Cabinet Model)

- Compact & User Friendly
- This is a fully automatic water distillation equipment has been designed for better and accurate control of the distillation unit and can be used in research laboratories, hospitals etc.
- It has been incorporated with advanced microprocessor based electronic circuitry.
- The alpha numeric LCD which has been used shows all messages that correspond to the running of the machine.
- Also there is alarm system which beeps as and when user attention is required.

The distillation has following features:

- Replaceable silica sheathed (Quartz) heater: The horizontal quartz jacket is fitted with removable silica heater and screw threaded connectors for ease of cleaning when scaling is formed.
- Cooling water from the condenser is re-circulated into the boiling chamber, hence saving energy.
- Boiler is provided with a Replaceable Side over Flow for easy draining and cleaning of boiling chamber, which also reduces the chances of breakage.
- The front cover is easily removable making the access to the glass parts very easy.
- Electrical Power: 220/240 V, 50/60Hz, Single Phase Supply.

Additional In-built Safety Features:

- Gate Valve: Conserves cooling water wastage in case of power failure.
- Flow Switch: Additional in-built safety feature for the equipment unit shut off in case of cooling water failure.
- Temperature switch: The boiler is equipped with a safety temperature switch which shuts off the unit if water level in the boiler falls below the heater, thus saving the glass parts from any damages.
- Reservoir Level Sensor: This helps in automatic working of the water distillation equipment. Depending on the water level in the reservoir it will automatically switch On/Off the equipment, thus saving energy. (Reservoir can also be provided with a storage capacity of 5 ltr, 10 ltr & 20 ltr made of Borosilicate Glass or polypropylene at an extra cost).

All Quartz Double Distillation (Horizontal Model)

Features

- Replaceable Silica Heater : The horizontal quartz jacket is fitted with removable silica heater and screw threaded connectors for ease of cleaning.
- Distillate temperature is approx. between 25° C to 45° C which is ensured by an efficient condenser.
- The stand is powder coated for rust free operation and lustrous appearance.
- Cooling water from the condenser is re-circulated into the boiling chamber, hence saving energy.
- Teflon Stop cork should be provided for easy draining, cleaning and maintenance.

Additional In-built Safety Features

- Gate Valve : Conserves cooling water wastage in case of power failure.
- Flow Switch : In-built safety feature for the equipment unit shut off in case of cooling water failure.
- Temperature switch : The boiler is equipped with a safety temperature switch which shuts off the unit if water level in the boiler falls below the heater, thus saving the glass parts from any damages.
- This new dual - safety cut off has been designed for better and accurate control of the distillation unit. It has been incorporated with advanced microprocessor based electronic circuitry. This has the latest electronic technology that has been introduced by our company which gives an easy user machine interaction.
- The alpha numeric LCD which has been used shows all messages that correspond to the running of the machine. Also there is alarm system which beeps as and when user attention is required.

All Quartz Double Distillation

- It has been designed keeping in view customer requirements Et easy serviceability of the equipment. All Quartz Double Distillation consists of demountable upper & lower boiler. The lower boiler has a built in heater enclosed in a quartz boiler with a cup on top.
- The upper boiler has a built in quartz coil and condensing unit which is mounted on the boiler with the help of ball and socket joint. Double walled condenser ensures separate condensation of vapours coming from the two boilers using a single cooling circuit.
- The unit is mounted on a specially designed powder coated stand and is also provided with automatic Safety Control Unit.
- This new dual - safety cut off device has been designed for better and accurate control of the distillation unit. It has been incorporated with advanced microprocessor based electronic circuitry.
- This has the latest electronic technology that has been introduced by our company which gives an easy user machine interaction.
- The alpha numeric LCD which has been used shows all messages that correspond to the running of the machine. Also there is alarm system which beeps as and when user attention is required.

Water Softner

- It softens the hard water and provides good quality water for use in laboratories. It helps to remove all the calcium and magnesium ions in hard water and the soft water thus obtained has hardness less than 5 ppm as CaCO₃. It is specially designed for easy serviceability and recharging the resin with sodium chloride solution. The softened water can be used as feed water to the Distillation Units. The use of hard water in boilers,
- would leave the boiler with a lot of scaling and sedimentation, hence to improve the quality of the distillate and for longer life of the glass/ Quartz boilers, it is recommended to use softened.

Pipette Filler

- These bulb type pipette fillers are designed for one hand operation. Pipette fillers improve worker safety by eliminating mouth pipetting and handling of hazardous materials.
- Users can control air evacuation, liquid uptake, and liquid dispensing with three valves containing chemically resistant stainless steel balls. Pinching or releasing valves provides smooth liquid flow. Fits standard size pipets.
- Pipette filler with 3 valves:
- Valve - A: Release air Valve, S: Filling Valve, E: Delivery

- Die pressed

Item	Type	Pack of	INR/Piece
BLS.MTW.06	Mild Steel, Powder Coated	1	455
BLS.MTW.07	Mil Steel, Chrome Plated	1	585

Universal Clamp

- To hold upto 12mm to 50mm with 7" m.s., chrome plated rod

Item	Type	Pack of	INR/Piece
BLS.MTW.08	Sheet made die pressed, spring controlled, locked by screw nut, cork lined jaws, powder coated	1	325

Burette Clamp

- Capacity hold upto 50mm dia with 7" rod cork lined.

Item	Type	Pack of	INR/Piece
BLS.MTW.09	Brass casting, Chrome Plated, Heavy Duty	1	1105
BLS.MTW.10	Al-alloy die casting, Mild Steel Rod Chrome Plated	1	537

Burette Clamp

- With attached boss head, movement in any angle.

Item	Type	Pack of	INR/Piece
BLS.MTW.11	Swivel type, Sheet Made, die Pressed, Powder Coated, hold upto 50mm dia	1	618

Three Prong Clamp

- with attached boss head, movement in any angle.

Item	Type	Pack of	INR/Piece
BLS.MTW.12	Aluminium made, Jaws dip coated swivel hold upto 90mm dia	1	813

Condenser Clamp

- Cork lined, finish powder coated.

Item	Type	Pack of	INR/Piece
BLS.MTW.13	Made of al-alloy die casting, hold upto 75mm dia, Chrome Plated 7" rod,	1	488
BLS.MTW.14	Made of Brass casting, powder coated, hold upto 75mm dia, Chrome Plated 7" rod,	1	1138

Universal Clamp

- Cork lined, finish powder coated.

Item	Type	Pack of	INR/Piece
BLS.MTW.15	Made of al-alloy die casting, hold upto 75mm dia, with M.S. Chrome Plated 7" rod,	1	520

Four Finger Clamp (Cross Pattern)

- Cork lined, finish powder coated.

Item	Type	Pack of	INR/Piece
BLS.MTW.16	Made of al-alloy die casting, hold upto 90mm dia, with M.S. Chrome Plated 7" rod,	1	488

Three Prong Clamp

- Jaws are dip coated.

Item	Type	Pack of	INR/Piece
BLS.MTW.17	al-alloy die casting, powder coated holds upto 90mm dia with 7" M.S. chrome plated rod.	1	488

Condenser Clamp

- With chrome plated mild steel rod.

Item	Type	Pack of	INR/Piece
BLS.MTW.18	Aluminium casting Three finger jaws, adjustable by two independent screw, rod 12" x 3/8.	1	1235
BLS.MTW.19	Moulded brass Three finger jaws, adjustable by two independent screw, rod 12" x 3/8.	1	2763

Jumbo Clamp (Three prong)

- Made of Brass casting jaws are rubber sleeves.

Item	Type	Pack of	INR/Piece
BLS.MTW.20	Chrome Finish Rod dia 12" x 3/8, Hold upto from 150mm dia articles	1	3575

Jumbo Clamp (Four/Three prong)

- Made of Al-alloy jaws are rubber sleeves.

Item	Type	Pack of	INR/Piece
BLS.MTW.21	Three Prong clamp can hold upto 150mm dia articles. M.S. Rod, Chrome plated size 12"x3/8	1	1495
BLS.MTW.22	Two Prong clamp can hold upto 150mm dia articles. M.S. Rod, Chrome plated size 12"x3/8	1	1430

Clamp Co-Axial (Three prong)

- Made of Al-alloy/Brass jaws are rubber sleeves.

Item	Type	Pack of	INR/Piece
BLS.MTW.23	Al-alloy jaws, Spring Controlled adjustable brass nut, hold upto 75mmdia, rod length 12" chrome plated.	1	1170
BLS.MTW.24	Brass moulding jaws, Spring Controlled adjustable brass nut, hold upto 75mmdia, rod length 12" chrome plated.	1	2210

**Boss Head**

- Made of Al-alloy die casting.

Item	Type	Pack of	INR/Piece
BLS.MTW.25	Mild steel with die pressed one piece thumb screw, holds upto 16 mm dia, powder coated finish.	2	208

**Boss Head**

Item	Type	Pack of	INR/Piece
BLS.MTW.26	Die Pressed Sheet made powder coated can hold upto 16mm dia.	2	156

Boss Head

- Brass Casting, Superior Quality.

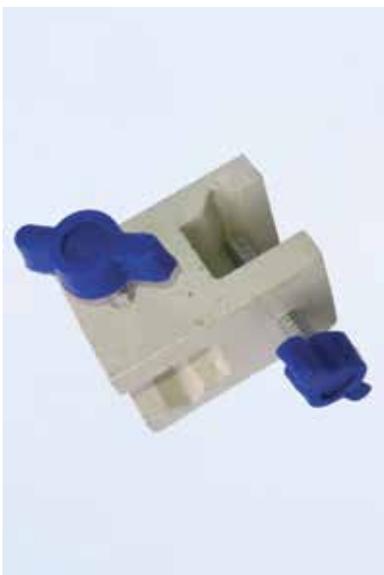

Item	Type	Pack of	INR/Piece
BLS.MTW.27	Can hold upto 18mm dia. Chrome Plated	2	1040
BLS.MTW.28	Can hold upto 13mm dia. Chrome Plated	2	715

Boss Head

- Cast Iron Make, Powder Coated.

Item	Type	Pack of	INR/Piece
BLS.MTW.29	T-type screw, can hold upto 13mm dia	2	228
BLS.MTW.30	T-type screw, can hold upto 18mm dia	2	358
BLS.MTW.31	T-type screw, can hold upto 25mm dia	2	455

Boss Head (Square)

- Made of Aluminum die casting.

Item	Type	Pack of	INR/Piece
BLS.MTW.32	T-type screw, Powder Coated. Hold upto 13mm dia.	2	455

Boss Head

- Aluminum Casting Make, Powder Coated.

Item	Type	Pack of	INR/Piece
BLS.MTW.33	T-type screw, can hold upto 16mm dia	2	423

**Boss Head**

- Made of Cast Iron die casting

Item	Type	Pack of	INR/Piece
BLS.MTW.34	Boss Head Cast Iron, can hold upto 18mm dia. With thumb screw.	2	553

**Tripod Stand**

- Cast Iron Made Having black powder coated triangular top, zinc plated legs and plastic rubber feet.

Item	Size (Inch)	Pack of	INR/Piece
BLS.MTW.35	6x4	1	280
BLS.MTW.36	6x5	1	377
BLS.MTW.37	7x4	1	286
BLS.MTW.38	7x5	1	390
BLS.MTW.39	7x6	1	455
BLS.MTW.40	8x4	1	299
BLS.MTW.41	8x5	1	390
BLS.MTW.42	8x6	1	585

Tripod Stand

- Sheet Made, fully Powder Coated, Having black powder coated triangular top, zinc plated legs and plastic rubber feet.

Item	Size (Inch)	Pack of	INR/Piece
BLS.MTW.43	6x4	1	221
BLS.MTW.44	6x5	1	247
BLS.MTW.45	7x4	1	228
BLS.MTW.46	7x5	1	260
BLS.MTW.47	7x6	1	325
BLS.MTW.48	8x4	1	247
BLS.MTW.49	8x5	1	280
BLS.MTW.50	8x6	1	358

Tripod Stand

- Heavy Cast iron round top black powder coated zinc plated rod and plastic feet.

Item	Size (Inch)	Pack of	INR/Piece
BLS.MTW.51	6x4	1	358
BLS.MTW.52	6x5	1	423
BLS.MTW.53	7x4	1	358
BLS.MTW.54	7x5	1	423
BLS.MTW.55	8x4	1	384
BLS.MTW.56	8x5	1	449
BLS.MTW.57	8x6	1	520

Retort Stand Sheet Full Bending Base

- Sheet thickness 4mm., Bottom edges covered with rubber sleeves, chrome plated rod.

Item	Size (Millimeter)	Pack of	INR/Piece
BLS.MTW.58	150x100x450x12	1	975
BLS.MTW.59	200x125x12	1	1365
BLS.MTW.60	250x150x750x12	1	2340

Retort Stand

- Made of cast iron powder coated base mild steel rod chrome plated.

Item	Base Size (Milimeter)	Pack of	INR/Piece
BLS.MTW.61	6x18x3/8	1	975
BLS.MTW.62	7x5x24x3/8	1	1105
BLS.MTW.63	8x5x24x12mm	1	1300
BLS.MTW.64	8x5x24x12mm	1	1495
BLS.MTW.65	9x6x30x12mm	1	2015
BLS.MTW.66	10x6x30x12mm	1	2275
BLS.MTW.67	12x7x36x12mm	1	3575
BLS.MTW.68	12x8x36x12mm	1	3738

**Retort Stand 202 grade**

- Stainless Steel Base, Bending type, Polish Finished, rust proof base, stainless steel rod.

Item	Base Size (Milimeter)	Pack of	INR/Piece
BLS.MTW.69	8x5x24x12mm	1	2600
BLS.MTW.70	9x6x30x12mm	1	2925

**Retort Stand**

- Made of mild steel with leveling screw and unbreakable nylon feet powder coated, mild steel rod chrome plated.

Item	Base Size (Milimeter)	Pack of	INR/Piece
BLS.MTW.71	6x4x18x3/8	1	683
BLS.MTW.72	7x5x24x3/8	1	845
BLS.MTW.73	8x5x24x3/8	1	910
BLS.MTW.74	8x5x24x12	1	975
BLS.MTW.75	9x6x30x12	1	1625

Retort Stand Bend Type

- Made of mild steel with powder coated heavy base, mild steel rod chrome plated.

Item	Base Size (Milimeter)	Pack of	INR/Piece
BLS.MTW.76	6x4x18x3/8	1	617
BLS.MTW.77	7x5x24x3/8	1	748
BLS.MTW.78	8x5x24x3/8	1	813
BLS.MTW.79	8x5x24x12	1	927
BLS.MTW.80	9x6x30x12	1	1398
BLS.MTW.81	10x6x30x12	1	1560
BLS.MTW.82	12x7x30x12	1	2048

Retort Ring

- Made of stainless steel, 202 grade wire polish finish, attached aluminium boss head "Thumb" type chrome plated screw.

Item	Size (Inch)	Pack of	INR/Piece
BLS.MTW.83	2	2	585
BLS.MTW.84	2½	2	585
BLS.MTW.85	3	2	585
BLS.MTW.86	4	2	715
BLS.MTW.87	5	2	780

Retort Ring

- Made of mild steel rod powder coated "T" type chrome plated screw.

Item	Size (Inch)	Pack of	INR/Piece
BLS.MTW.88	2	2	254
BLS.MTW.89	2½	2	254
BLS.MTW.90	3	2	260
BLS.MTW.91	4	2	293
BLS.MTW.92	5	2	325
BLS.MTW.93	6	2	390

Bunsen Burner

Item	Specification	Pack of	INR/Piece
BLS.MTW.94	Nickel plated burner tube 115 x 13 mm, with rotatable air regulator, mounted on a powder coated, heavy die cast base of 80mm dia, overall height approx 140mm	1	1138

**Bunsen Burner**

- Low Pressure regulator

Item	Specification	Pack of	INR/Piece
BLS.MTW.95	Heavy cast iron powder coated base brass tube, dia 12mm. With spare jet. Without Stop Cock	1	639
BLS.MTW.96	Heavy cast iron powder coated base brass tube, dia 12mm. With spare jet. With Stop Cock	1	845
BLS.MTW.97	Heavy cast iron powder coated base S.S. tube, dia 12mm. With spare jet. With Stop Cock	1	780
BLS.MTW.98	Heavy sheet base iron, powder coated base M.S. tube, dia 12mm. With spare jet. With Stop Cock	1	618

**Bunsen Burner**

Item	Specification	Pack of	INR/Piece
BLS.MTW.99	Heavy cast iron powder coated base with stop cock, Double Walled Brass Pipe with spare jet.	1	1463

Gas Tap

- All brass Chrome Plated square type Leak proof stop cock.
- 1/2" fitting for gas supply.

Item	Specification	Pack of	INR/Piece
BLS.MTW.100	One Way	1	1235
BLS.MTW.101	Two Way	1	1495
BLS.MTW.102	Three Way	1	1690
BLS.MTW.103	Four Way	1	2015

Laboratory Jack

- Made of Stainless Steel (304 G), smooth up & down movement, stability on high too.

Item	Size	Pack of	INR/Piece
BLS.MTW.104	120x140	1	9425
BLS.MTW.105	150x150	1	10075
BLS.MTW.106	200x200	1	14950
BLS.MTW.107	250x250	1	20150
BLS.MTW.108	300x300	1	26000

Laboratory Jack

- Made of mild steel, black powder coated. Smooth up & down movement, stability on high too.

Item	Size	Pack of	INR/Piece
BLS.MTW.109	120x140	1	4388
BLS.MTW.110	150x150	1	4713
BLS.MTW.111	200x200	1	5525
BLS.MTW.112	250x250	1	8125
BLS.MTW.113	300x300	1	11150

Beaker Tong

Item	Specification	Pack of	INR/Piece
BLS.MTW.114	Made of thick Stainless Steel 12" long, wrapped with heat resistant yarn.	1	415
BLS.MTW.115	Made of thick mild steel, chrome plated wire 12" long, wrapped with heat resistant yarn.	1	618

**Flask Tong**

Item	Specification	Pack of	INR/Piece
BLS.MTW.116	Made of thick Stainless Steel 12" long, wrapped with heat resistant yarn.	1	715
BLS.MTW.117	Made of thick mild steel, chrome plated wire 12" long, wrapped with heat resistant yarn.	1	618

**Furnace Tong**

Item	Size (Inch)	Type	Pack of	INR/Piece
BLS.MTW.118	12	Stainless Steel	1	585
BLS.MTW.119	12	Mild Steel	1	455
BLS.MTW.120	15	Stainless Steel	1	845
BLS.MTW.121	18	Stainless Steel	1	975
BLS.MTW.122	24	Stainless Steel	1	2275

Crucible Tong

Item	Size (Inch)	Type	Pack of	INR/Piece
BLS.MTW.123	6	Stainless Steel	1	195
BLS.MTW.124	6	Mild Steel	1	150
BLS.MTW.125	8	Stainless Steel	1	260
BLS.MTW.126	8	Mild Steel	1	182
BLS.MTW.127	8	Stainless Steel Heavy	1	390
BLS.MTW.128	8	Mild Steel Heavy	1	228
BLS.MTW.129	10	Stainless Steel	1	423
BLS.MTW.130	10	Mild Steel	1	325

Cork Borer German Type

- All Brass chrome plated, made of heavy pipe for making hole of different sizes in cork.

Item	Model	Pack of	INR/Set
BLS.MTW.131	Set of Three	1	1625
BLS.MTW.132	Set of Six	1	3315
BLS.MTW.133	Set of Twelve	1	8450

Cork Borer

- Made of brass, Chrome plated.

Item	Model	Type	Pack of	INR/Set
BLS.MTW.134	Set of Three	Brass, Chrome Plated	1	455
BLS.MTW.135	Set of Three	Iron, Chrome Plated	1	325
BLS.MTW.136	Set of Six	Brass, Chrome plated	1	813
BLS.MTW.137	Set of Six	Iron, Chrome Plated	1	488
BLS.MTW.138	Set of Twelve	Brass, Chrome plated	1	4225
BLS.MTW.139	Set of Twelve	Iron, Chrome Plated	1	3250

Cork Borer Machine with Borer

- A cork borer, often used in a chemistry or biology laboratory, is a metal tool for cutting a hole in a cork or rubber stopper to insert glass tubing. Nickel-plated borers included.

Item	Pack of	INR/Piece
BLS.MTW.140	1	18200

Spatulas

- Made of Stainless Steel sheet, heavy, one end spoon and one end flat.

Item	Size (Inch)	Pack of	INR/Piece
BLS.MTW.141	4	10	59
BLS.MTW.142	5	10	65
BLS.MTW.143	6	10	65
BLS.MTW.144	8	10	98
BLS.MTW.145	10	10	208
BLS.MTW.146	12	10	260

Micro Spatulas

- Made of Stainless Steel, Spoon Type, Spl. use for mercury

Item	Size	INR/Piece
BLS.MTW.147	4 Inch	59
BLS.MTW.148	6 Inch	72
BLS.MTW.149	8 Inch	91
BLS.MTW.150	10 Inch	117
BLS.MTW.151	12 Inch	208

Chattaway Micro Spatulas

- Made of Stainless Steel, Spoon Type, Spl. use for mercury

Item	Size	INR/Piece
BLS.MTW.152	4 Inch	59
BLS.MTW.153	6 Inch	72
BLS.MTW.154	8 Inch	91
BLS.MTW.155	10 Inch	117
BLS.MTW.156	12 Inch	208

*Pack of 10 Pcs.

Hoffman's Screw Clip

- Brass Chrome Plated.

Item	Size (mm)	Pack of	INR/Piece
BLS.MTW.157	25mm	10	358

Spirit Lamp

Item	Specification	Pack of	INR/Piece
BLS.MTW.158	Stainless Steel	1	212
BLS.MTW.159	Brass	1	585

Brush, Beaker

- Hard nylon bristles on twisted G.I. wire, head 140 x 63 mm, overall length 400 mm approx.

Item	Pack of	INR/Piece
BLS.NB.001	1	70

**Brush, Beaker**

- Hard nylon bristles on stainless steel wire, head 150 x 85 mm, overall length 400 mm.

Item	Pack of	INR/Piece
BLS.NB.002	1	160

**Brush, Beaker**

- Hard nylon bristles on wooden handle, head 150 x 75 mm, overall length 325 mm approx.

Item	Pack of	INR/Piece
BLS.NB.003	1	130

Brush, Bottle

- Hard nylon bristles, mounted on twisted G.I. wire, head 120 x 65 mm, overall length 500 mm.

Item	Pack of	INR/Piece
BLS.NB.004	1	70

Brush, Burette

- Hard nylon bristles, mounted on twisted G.I. wire, Available in following sizes

Item	Pack Size	Pack of	INR/Piece
BLS.NB.005	Head 15 X 150 mm., overall length 900 mm	1	55
BLS.NB.006	Head 25 X 150 mm., overall length 915 mm	1	60

Brush, Test Tube

- Hard nylon bristles, mounted on twisted G.I. wire, head 90 x 45 mm., overall length 250 mm.

Item	Pack of	INR/Piece
BLS.NB.007	1	35

Brush, Semi Micro Test Tubes

- For small test tube of 6-10 mm diam., head 10 x 70 mm, overall length 175 mm. Nylon White

Item	Pack of	INR/Piece
BLS.NB.008	1	30

**Brush, Flask**

- Hard nylon bristles, mounted on twisted G.I. wire, head 130 x 50 mm. overall length 360 mm.

Item	Pack of	INR/Piece
BLS.NB.009	1	60

**Brush, Flask**

- For round bottom flask upto 100 mm diam., Nylon bristles on twisted G.I. wire handle. Overall length 330 mm.

Item	Pack of	INR/Piece
BLS.NB.010	1	60

**Brush, Pipette**

- Nylon Bristles on twisted G.I. Wire, head size 125 x 10 mm, overall length 650 mm for pipettes and tubes from 8-12 mm dia.

Item	Pack of	INR/Piece
BLS.NB.011	1	40

Mortar & Pestle, Porcelain

- Mortar with spout, glazed outside except bottom, unglazed inside. Pestle unglazed to grinding surface

Item	Top Dia., mm	Capacity, ml	Pack of	INR/Piece
BLS.PCS.001	80	60	1	120

Biohall Colourware Exclusive Range

Choose Premium Quality Glassware * BIOHALL® Colorware, Biohall exclusive line

- Easy to identify among laboratories
- Easy product visualization
- Identification of color analysis
- Identification of reagent types
- Matte finish at marking points for use with pencil or marker
- Premium glazing: High quality borosilicate glass, thermal and physical resistance, high precision (Compatible internationally)
