A New Horizon: Embracing Change and Growth

Dear Esteemed Associates and Patrons,

Greetings from ADVENT CHEMBIO PVT. LTD.!

As we welcome you to explore the latest edition of our price list, PL-06, we do so with a renewed sense of optimism and purpose. The challenges of last few pandemic years may have been daunting, but they have also ignited a spirit of resilience and innovation within us. Today, as we stand together, we embrace a new horizon, ready to navigate the ever-changing landscape with unwavering determination.

Here at ADVENT, we recognized the importance of adaptation with changing reality and swiftly adopted new measures to reshape our business. We witnessed the rapid rise of digitization, remote collaboration, and advanced customer relationship management—transformations that have become integral to the modern business arena. We incorporated automation and implemented various softwares for smooth functioning and monitoring of processes. To name a few, ADVENT's new website has been launched, QR code on product label for quick download of certificate of analysis implemented, ADVITA reporting and online quotation system initiated and order management system is also in progress. ADVENT is still evolving and working in that direction of further automation.

We conducted our first ever distributor meet & greet - Milaap 2023 in May 2023 at Taj Vivanta, Navi Mumbai, which was a great occasion to infuse new sense of direction and purpose to our shared dreams and successes with our channel partners.

With over 1000 new entries across various categories—Fine and Specialty Chemicals, Customized Intermediates, Certified Reference Materials, and Pharmaceutical Impurities—this catalogue embodies our dedication to excellence and continuous growth. Over the years, your invaluable support has propelled us forward in both domestic and overseas markets, establishing us as a reliable supplier of value-added products to esteemed pharmaceutical companies worldwide.

To add to our previous accomplishment of commissioning an FDA approved, cGMP compliant manufacturing plant, we have recently acquired a bigger plot at MIDC, Navi Mumbai for establishment of our enhanced capacity plant. We have also created a bigger state-of-art corporate office to accommodate and provide excellent working environment to our growing human resource and smoothen the coordination across our inter-departmental functions. All these signify our commitment to meeting the evolving developmental and manufacturing needs of the chemical, pharmaceutical, and allied industries. Our increasing exports to countries in Middle East, Africa, South East Asia, and Europe have further fortified our position as a Quality-driven organization, contributing to the "Make in India" initiative and transitioning us from a Local to Global company.

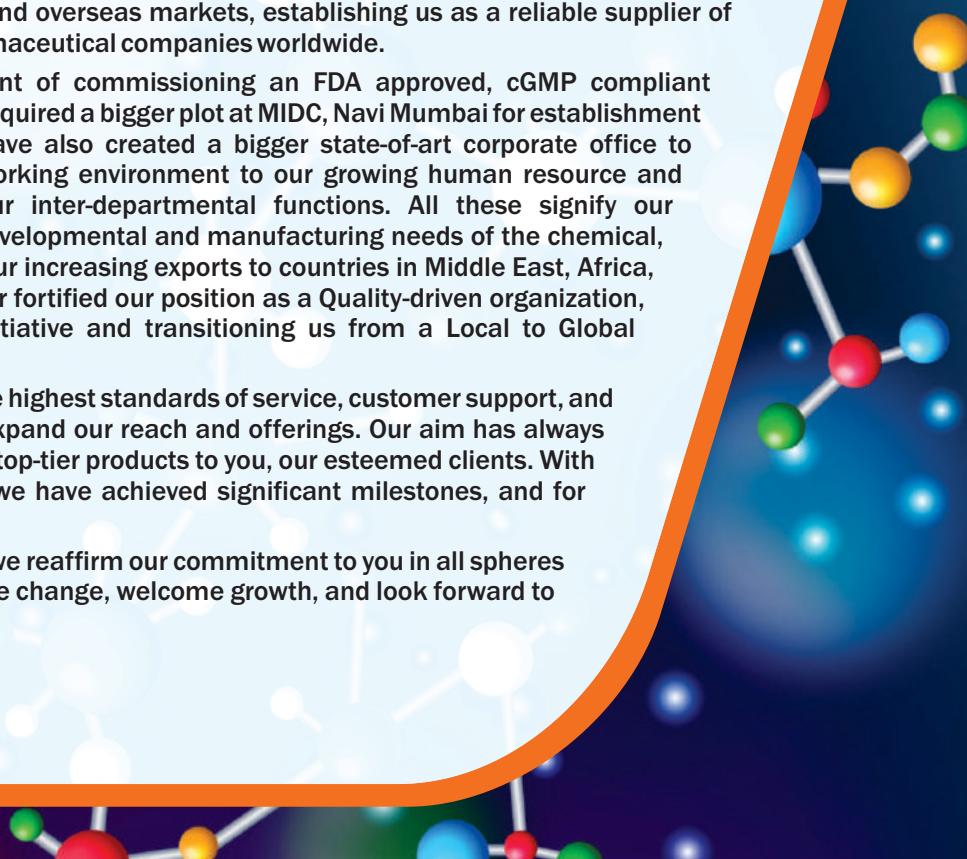

We remain committed to maintaining the highest standards of service, customer support, and technical expertise, as we continue to expand our reach and offerings. Our aim has always been to provide consistent, reliable, and top-tier products to you, our esteemed clients. With your continued support and feedback, we have achieved significant milestones, and for that, we extend our heartfelt gratitude.

As we turn a new chapter in our journey, we reaffirm our commitment to you in all spheres of our interactions. Together, we embrace change, welcome growth, and look forward to building a brighter, shared future.

Thank you for your unwavering support...

Sincerely yours,

Team ADVENT

Potassium Bromide for IR & FT-IR

Potassium Bromide (KBr) is a white crystalline solid & is transparent especially in the mid-infrared region spanning from $2.5\text{ }\mu\text{m}$ to $25\text{ }\mu\text{m}$ and in terms of wave number (which is inverse of wavelength) it is 4000 cm^{-1} to 400 cm^{-1} . In infrared spectroscopy, the solid samples which are difficult to melt or dissolve in any suitable IR-transmitting solvent, are analyzed by grinding with powdered potassium bromide and pressing into a disc.

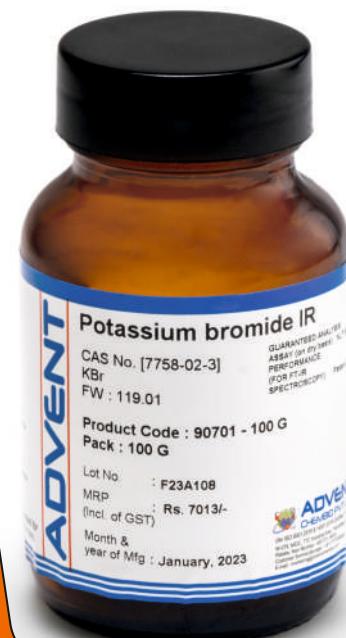

It is very crucial to avoid interference from any contaminants during its manufacturing process so as to maintain the optical purity of the potassium bromide powder.

Highlights of ADVENT KBr (IR)

- Uniform particle size
- Free from absorbing impurities
- High optical purity
- Thoroughly dried & packed under inert atmosphere
- Batch to batch consistency

Trifluoroacetic Acid HPLC/LCMS

Trifluoroacetic acid (TFA) is the most commonly used ion pairing agent for use in reverse-phase HPLC peptide separations because it sharpens peaks and improves resolution, is volatile and easily removed, and has low absorption within detection wavelengths. ADVENT has TRIFLUOROACETIC ACID HPLC/LC-MS in 3 ml ampoules. Considering the customized use of this product in small amounts for mobile phase preparations in Reversed phase HPLC, servicing in 3 ml ampoules is a customer-friendly step that will ensure one-time use of ampoules as well as contamination-free and accurate results.

Applications of Trifluoroacetic Acid (TFA)

- Ion pairing reagent for reverse-phase HPLC
- Protein/peptide sequencing
- Protein/peptide solubilizing agent
- Solid-phase peptide synthesis
- Amino acid analysis
- Making 0.1% solutions of trifluoroacetic acid (w/v vs. v/v) for LC-MS analysis

N-Nitrosamine Impurities in ADVENT range

- N-Nitrosamines are potential genotoxic compounds/carcinogens.
- Studies show that they can cause DNA mutation and cancer due to their presence in drugs.
- USA FDA and EMA recalled some Sartan group of drugs in July 2018 due to the presence of a Nitrosamine i.e., NDMA (N-Nitrosodimethylamine).
- Many of such Nitrosamines have been added to the list of carcinogens since then.
- Both regulatory agencies have issued guidelines on the allowable limits of Nitrosamines to ensure safety of the drugs.

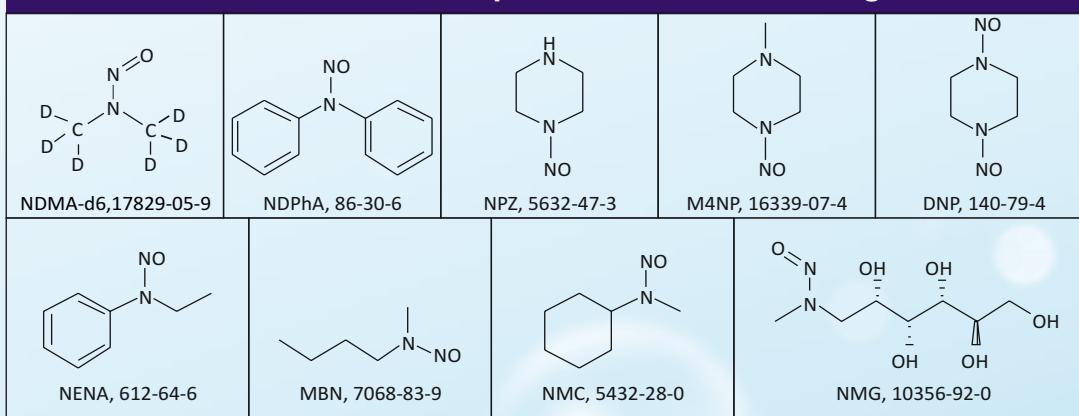

We, at the ADVENT, have been able to develop and service the following N-Nitrosamine impurities as standards to our esteemed customers for their quantitative evaluation in respective drug compounds.

LAC

531-RM

Art.Nr.: CL01.1221

Lot Nr.: 28.1980911

Lead standard solution 1000 µg/ml (Plasma HIQU)

1 g Pb / l 2 to 5% HNO₃

Density: (1,02818 ± 0,00021) g/mL - 20°C

Certified value: (978 ± 7) µg/g

Certification and Traceability: The certified mass fraction shown above was achieved by method BM006 that uses the "High Performance ICP-OES" protocol developed by NIST. This value is traceable to the International System of Units (SI) via the value of the reference material NIST SRMs 3128, Lot: 101026. The certified density shown above was measured by method BM008 that uses either an oscillating densitometer or a pycnometer. This value is traceable to the International System of Units (SI).

Uncertainty: The reported uncertainty of the certified value is the expanded uncertainty with coverage factor k=2 corresponding to a level of confidence of about 95% estimated in accordance with GUM and EA-4/02 by procedures consistent with the requirements of ISO 17034 and ISO Guide 35.

GC Secondary Reference Standards

(Traceable to USP Reference Standards)*

Features and Benefits

- Reference substances are used for the identification of unknown compounds, as standards in quantitative analysis.
- Assay is generally greater than 99%, and typically over 99.5%. Some are more than 99.9%.
- Virtually free from isomers
- Highly pure substances for reliable analysis
- Potency is mentioned in the CoA.
- Providing all the characterization documents

ADVENT continues to add new GC Secondary Reference Standard Solvents, in its ever-expanding product range. We are providing the following supporting documents along with CoA for each standard.
